

Cosmetic Dentistry FAQ

Is cosmetic dentistry expensive?

It's a common misconception that cosmetic dentistry isn't affordable for most people. In fact, cosmetic dentistry is one of the fastest growing dental practices today. Our services include effective and affordable treatments such as professional tooth whitening, and reconstructive dental treatment done with an eye for aesthetics.

In addition to this, our doctors provide all their patients with financing options so that they can achieve the smile they. We can help you find a financing plan so that nearly any cosmetic dentistry procedure will fit within your budget.

What are the best procedures for my problems?

We offer a range of solutions for a variety of problems. Which procedures are right for you depend on a number of factors, including the type and extent of your problem, associated factors such as time, expense, and other dental conditions, as well as your unique preferences and goals.

As a first step in evaluating your options, we recommend you call or email us for a free personal consultation. Drs Rice & Rollingson and their friendly staff will listen to your concerns, answer your questions, and discuss some of the options available to you.

Why cosmetic dentistry?

We believe that it's important to take aesthetics into account in all of our work. Whether it's restorative work such as dental implants or replacement fillings, or a strictly cosmetic procedure such as tooth whitening, the way you look affects the way you feel.

A beautiful smile can improve your self-confidence and make you feel younger, more vital, and more attractive. It can also improve the way others see you. We understand how the way you look affects the way you feel, and we want to help you feel great.
